## CHECKS AND BALANCES

The United States Constitution calls for a federal government with three separate and equally powerful divisions: the legislative (Congress), the executive (the President), and the judicial (the Supreme Court) branches.

The Constitution gives each branch the ability to limit the powers of the other two. This is a system known as checks and balances. The table below shows some of the powers granted to each branch. Study it, then answer the questions.

The U.S. Congress	The President	The Supreme Court
<ul style="list-style-type: none"> <li>Congress makes the country's laws. It has two chambers: the U.S. House of Representatives and the U.S. Senate.</li> <li>Congress can check the executive branch through its power to appropriate funds (decide how much money will be spent on various purposes).</li> <li>If the President vetoes (rejects) a law, Congress can override the veto by a two-thirds vote in both chambers.</li> <li>The Senate must approve treaties and presidential appointments.</li> <li>The House has the power to impeach (accuse of a crime or misdemeanor) U.S. officials, including the President and Supreme Court Justices.</li> <li>The Senate has the power to try U.S. officials who have been impeached.</li> </ul>	<ul style="list-style-type: none"> <li>The President enforces federal laws, commands the U.S. Armed Forces, makes treaties, and appoints judges, ambassadors, and other high-level officials.</li> <li>The President can check the power of Congress by vetoing bills. However, Congress can override this veto if it has enough votes in both chambers.</li> <li>The President checks the power of the Supreme Court by appointing its Justices. The Senate must approve these appointments.</li> <li>The President can pardon (excuse) people who have committed "offenses against the United States," except in cases of an official's impeachment.</li> </ul>	<ul style="list-style-type: none"> <li>The Supreme Court can hear and decide cases appealed from state or federal courts under the Constitution, U.S. laws, or treaties. (On rare occasions, it may hear cases that haven't gone through the lower courts.) It can try cases involving disputes between states.</li> <li>The Court can check Congress by ruling that a law is unconstitutional.</li> <li>The Court can check the power of the executive branch by ruling that one or more of its actions is unconstitutional.</li> </ul>

**QUESTIONS** Write your answers on a separate sheet of paper.

- Which branch of government can appoint judges, ambassadors, and other government officials?
- How can Congress override a presidential veto?
- How can the Supreme Court check actions by Congress?
- Who has the power to impeach a government official?
- Which branch of the federal government commands the U.S. Armed Forces?
- Which branch of government can try a dispute between states?
- Which group has the power to try an official who has been impeached?
- Which branch makes the country's laws?
- Which group has the power to approve treaties?
- Would you rather be the President, a U.S. Senator, a U.S. Representative, or a Supreme Court Justice? Give reasons for your answer.

Why is checks and balances good. Checks and balances chart worksheet answers. What does the checks and balances do. Checks and balances flow chart worksheet answers.

Checks and balances are various procedures set in place to reduce mistakes, prevent improper behavior, or decrease the risk of centralization of power. Checks and balances usually ensure that no one person or department has absolute control over decisions, clearly define the assigned duties, and force cooperation in completing tasks. The term is most commonly used in the context of government but also refers to limiting power in businesses and organizations. Checks and balances refer to the separation of power to avoid one entity or body wielding too much power. Checks and balances can help reduce mistakes and prevent improper behavior in organizations. Checks and balances are most commonly used in the context of government, for example in the U.S. government through the establishment of the executive branch, the legislative branch, and the judicial branch. Checks and balances are important in businesses and other organizations where one individual can make decisions that affect operations, such as the CEO or a majority

shareholder.The idea of checks and balances dates as far as the Roman empire. The U.S. government exercises checks and balances through the legislative, executive, and judicial branches. It operates as a constitutionally limited government and is bound to the principles and actions that are authorized by the federal—and corresponding state—constitution. Checks and balances are important in businesses and other organizations where one individual can make decisions that affect operations. Checks and balances can cost more money and decrease efficiency but can be critical in helping to identify internal and external theft. By separating the duties of various employees into clearly defined roles, businesses and organizations are better able to ensure that rogue employees or executives cannot harm a business without the intervention of other employees. Having these types of internal controls in a business can help improve operational efficiency. Internal control systems of publicly listed businesses in the U.S. use checks and balances. This is a requirement of the Sarbanes Oxley Act. The directors of such businesses have a legal obligation to ensure a proper system of internal control that includes checks and balances. The United Nations has six internal institutions: the International Court of Justice, the General Assembly, the Economic and Social Council, the Trusteeship Council, the UN Secretariat, and the Security Council. Each of these institutions has different responsibilities, such as maintaining international peace, policy review and recommendations on economic, social, and environmental issues, and an international court. The UN's voting system and veto power policy allow individual countries to check the power of other countries. The individuals working in these bodies and the bodies themselves cannot influence each other. Given that the UN has a wide global influence, impacting most nations around the world, it's critical that different directives are handled by different groups so as to avoid a concentration of power. The U.S. Constitution provides checks and balances for the U.S. government through the separation of powers between its three branches: the legislative branch, the executive branch, and the judicial branch. The Constitution gives specific abilities to each one of these three branches to ensure that no one section of the government could obtain excessive unchecked power. Checks and balances are practiced by the U.S. government in the following ways. First, the legislative branch is the part of the government that makes laws, but the executive branch gives veto power to the president, allowing the president to keep the legislative branch in check. In addition, the judicial branch, the part of the government that interprets the laws put into effect by the legislative branch, can deem certain laws unconstitutional making them void. Moreover, while the president has veto power, the legislative branch can overturn a president's veto with a two-thirds "supermajority" vote by both houses of Congress. This ensures that the president cannot use his power for personal gain. The executive branch can also declare executive orders, effectively proclaiming how certain laws should be enforced, but the judicial branch can deem these orders to be unconstitutional. Executive orders are often declared for the benefit of the country and are rarely considered unconstitutional. For example, on April 19, 2016, President Obama proclaimed an executive order that blocked property and suspended entry into the U.S. of all people who were seen to contribute to the current situation in Libya. In this scenario, the judicial branch stood firm with the president's order. In another example of executive power, President Trump declared a national emergency on Feb. 15, 2019, in an effort to free up billions in funding for a proposed border wall, after efforts to get the spending approved through Congress failed to gain approval. In the U.S. government, checks and balances refers to the separation of power in the government, which is ensured through the establishment of three different branches: the executive branch, the judicial branch, and the legislative branch. All hold different powers and, therefore, can check the power of the other branches. The idea of checks and balances, which is a separation of power, was first proposed by the Greek statesman, Polybius, in reference to the government of Ancient Rome. During the Age of Enlightenment, French philosopher, Baron de Montesquieu, discussed in his work, *The Spirit of Laws*, the need for the separation of powers to prevent despotism. Checks and balances in the world economy can be seen through the variety of global organizations that seek to check the power of different nations, organizations, and individuals. Groups such as NATO, the UN, the World Trade Organization (WTO), the International Criminal Court (ICC), all seek to check the power of other nations and institutions. The Checks and Balances System: A Worksheet Various governmental powers are listed below. Identify the branch doing the checking and the branch being checked. More than one answer is possible per section. Power Branch Branch Being Checked 1) Create and pass legislation. Legislative Branch Executive Branch 2) Veto bills. Executive Branch Legislative Branch 3) Ratify treaties. Legislative Branch Executive Branch 4) Appoint Federal judges. Executive Branch Judicial Branch 5) Impeachment of federal officials. Legislative Branch Executive Branch 6) Confirm presidential appointments. Legislative Branch Judicial Branch, Executive Branch 7) Declare laws unconstitutional. Judicial Branch Legislative Branch, Executive Branch 8) Override Presidential Vetoes. Legislative Branch Executive Branch 9) Judges are appointed for life. Judicial Branch Executive Branch, Legislative Branch 10) Controls appropriations of Money. Legislative Branch Executive Branch To The Checks and Balances Worksheet To The Checks and Balances Lesson George Cassutto's Cyberlearning World [Lesson Plan of the Day] [Cassutto Memorial] [About the Author] [Search] [Civics Lesson Plans] By BRUCE KAMICH Jan 05, 2021 | 09:48 AM EST Stocks quotes in this article: CHKP During the Lightning Round segment of Jim Cramer's Mad Money program Monday night, one caller asked about Check Point Software Technologies Ltd. (CHKP) . "I think this is a good one," replied Cramer. What do the charts say? When we last reviewed the charts of CHKP back on June 23 we said, "CHKP needs one or two strong up days with increased volume to "get it moving" higher. Traders could go long on strength above \$111 and above \$114. Risk a close below \$105 for now." Prices reached our first price target of \$132 by early September. Let's check out the charts again. In the daily bar chart of CHKP, below, we can see that the shares are pulling back after a recent breakout to new highs. Prices are above the rising 50-day moving average line and the rising 200-day moving average line. The On-Balance-Volume (OBV) line shows weakness from August into December before the December rally. I don't know if this improvement in the OBV line is sustainable or just a temporary event. The Moving Average Convergence Divergence (MACD) oscillator is above the zero line but it has narrowed in recent days. In the weekly bar chart of CHKP, below, we can see how prices broke out over the highs of 2020 and early 2019. The recent pullback in prices looks like a retest of the highs or former resistance. The \$130 area should act as support now. We'll see. The 40-week moving average line has a positive slope and the weekly OBV line shows strength since April but it has not made its own new high so this is a bearish divergence. The MACD oscillator crossed to the upside last month for a fresh buy signal. In this daily Point and Figure chart of CHKP, below, we can see that the shares reached a \$134 price target. In this weekly Point and Figure chart of CHKP, below, we can see a potential price target of \$179. Bottom-line strategy: Traders who are still long CHKP should raise stop protection to \$119 from below \$105. Wait for a new high close before adding to longs. The \$179 area is our price target for the second half 2021. Get an email alert each time I write an article for Real Money. Click the "+Follow" next to my byline to this article. Employees of TheStreet are prohibited from trading individual securities. Let's check the charts and indicators. But whether the stock of the discount retailer will make a good value investment anytime soon remains up in the air. Stay with the long side, and here's our price target now. If you're a trader, you are never allowed to just sit back, coast and turn a blind to your trade risk. BABA, which is applying for a joint primary listing in Hong Kong just in case, says it will 'strive' to retain its U.S. stock listing.
